PATIO DOOR

PVCu Windows and Doors that make your home more secure, thermally efficient and elegant

Welcome

Selecta Systems Ltd are one of the UK's leading extruders and distributors of PVCu window and door profile systems

Selecta Systems are a company with pedigree and integrity which is recognised for technical superiority, premium quality products and performance standards. Selecta prides itself on the reputation it has established over the years, as a market leading innovator, with unrivalled customer and technical support services and quality assurance.

Initially Selecta were introduced into the UK market from Germany in 1982 and have since established a standing for unrivalled quality and reliability, when it comes to PVCu window and door solutions. Selecta have developed strong business relations with fabricators across the UK, ensuring that they tailor requirements to meet individual and consumer needs.

With those many years of knowledge and experience, Selecta Systems are firmly established as one of the UK's leading extruders of PVCu window and door systems. As a specialist within the industry Selecta Systems peace of mind warranty is of paramount importance, with a dedicated team committed to providing only the best in terms of product and support services.

Window & Door Performance

To ensure new products achieve optimum performance, continuous analysis is an ongoing main priority. Products are selected for their durability and longevity and are subject to rigorous internal and external tests to satisfy both customer and climatic demands.

The product range from Selecta Systems has been carefully developed to incorporate a wide range of design aspects. Being aware of architects and specifiers requirements, planning is a vital component to ensuring that the most suitable products are provided for individual projects.

Window, Door & Conservatory Fabrication and Installation

Selecta Systems have a network of fabricators and installers throughout the UK whom have been approved and endorsed by Selecta to manufacture their windows and doors. Not just anyone can fabricate Selecta products! The network of approved Selecta fabricators have undergone a course of training by Selecta engineers to ensure they have adequate knowledge, skills and competence, and that the fabrication of Selecta products are carried out to a high standard.

Periodic service calls ensure that the approved fabricators continue to fabricate Selecta's products to that high standard which Selecta demands. What this means to the consumer is that your windows and doors have not only been extruded and tested to comply with industry standards, but also that the fabricator has met the criteria determined by Selecta for the fabrication of Selecta products.

Your Home Made Beautiful

With Modern PVCu Windows & Doors

Modern PVCu windows and doors ultimately provide you with increased thermal performance thus ensuring heat stays in your home and reducing your energy costs.

Also, double or even triple glazed windows and doors have increased sound insulation along with high security locking systems and hardware.

All-in-all modern PVCu products will outperform older single and double glazed alternatives, increasing thermal efficiency throughout the home and improving security, whilst offering an aesthetically pleasing improvement to your home.

The innovative **ADVANCE 70 Window and Door Profile System** from Selecta Systems has been designed to blend seamlessly in to the framework of your home, combining exceptional performance with beauty and elegance.

Using the most advanced technology, products from the Selecta Systems range of window and door solutions will provide the ultimate in terms of thermal and sound insulation, appearance, durability and security.

20%

“Modern energy efficient Windows & Doors could **save you up to 20% off** your heating bill when **upgrading** from single glazed or older double glazed units”

“Modern PVCu products will outperform older single and double glazed alternatives, increasing thermal efficiency throughout the home and improving security”

Increased Thermal Performance = Lower Energy Bills

Increased Durability = Improved Security

Increased Sound Insulation = Less Noise Pollution

With Modern PVCu Windows & Doors

Energy Ratings and Thermal Efficiency

With Modern PVCu Windows & Doors

The window and door profiles used to make the frames for your home offer excellent thermal insulation, as the gaskets and weathertight seals shut out draughts while the glazing reflects the heat back in to your room.

The five chambers within the profiles also greatly improves the heat loss from your home. A combination of these aspects that will greatly reduce energy bills.

The benefits of energy-efficient windows

Smaller energy bills: replacing all single-glazed windows with A++ rated double glazing could save you around £235 per year on your energy bills.

A smaller carbon footprint: by using less fuel, you'll generate less of the carbon dioxide that leads to global warming.

A more comfortable home: energy-efficient glazing reduces heat loss through windows and means fewer draughts and cold spots.

Peace and quiet: as well as keeping the heat in, energy efficient windows insulate your home against outside noise.

Reduced condensation: energy-efficient glazing reduces condensation build-up on the inside of windows.

The costs and savings for energy-efficient glazing will be different for each home and each window, depending on the size, material and installer. Double glazing should last for 20 years or more.

Enhanced Security

With Modern PVCu Windows & Doors

The Selecta Systems product range is British Standard Institute (BSI) tested and approved and is subjected to regular, extensive testing that is conducted via internal procedures and external independent assessment.

BSi Kitemark accreditation reflects high industry standards, where tests expose the products to various extremes when installed, to demonstrate conformity, which reflects the premium quality of the profiles that are extruded by the company.

Providing You With 'Peace of Mind'

With manufactured windows and doors tested and approved to PAS 24 and Secured by Design you can be assured of total 'peace of mind' when it comes to security.

Through regular assessment and ongoing monitoring procedures, the company guarantees that only the highest standards are maintained from design and production through to delivery and installation.

Secured by Design

Selecta Systems window and door products have been designed to conform to the requirements of the Association of Chief Police Officers.

PAS 24

Selecta Systems window and door products have been designed to conform with the standard for enhanced security performance requirements for window assemblies, which also includes testing for air and water tightness and wind loading.

76%

" In **76%**
of cases
the burglar
will enter through
a door and in
20% of cases they
will enter
through a
window "

Don't become a statistic!

Information on burglary statistics taken from
www.ons.gov.uk/peoplepopulationandcommunity/crimeandjustice/datasets/natureofcrimeburglary

PAS 24
Windows & Doors

ADVANCE 70 Windows & Doors use high security locking systems, tested to PAS 24 & Secured By Design standards...

An inferior window or door locking system can be manipulated, snapped, picked, drilled or bumped to gain access to your property in less than 30 seconds! This is why our **ADVANCE 70** system uses tried and tested security hardware on our windows and doors.

So what are my Enhanced Security options?

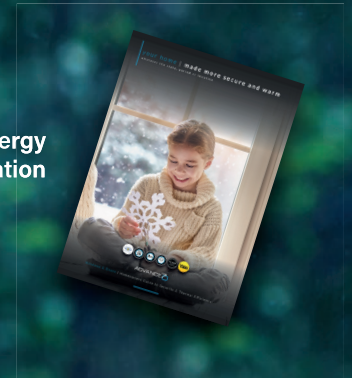

An Enhanced Security option is compliant with PAS 24 and Secured by Design. This means that the complete and fully manufactured window or door has been rigorously and independently tested by a UKAS accredited test house.

The PAS 24 standard is an extra security measure to ensure windows and doors are up to the security standards, in case you do so happen to have a break in. The testing is based on a burglar trying to manipulate a cylinder, cut-through a slab or panel or force the lock and/or hinge side of a door. On a window forcing entry through the locking points using a selection of tools including 'crow bars', screwdrivers, chisels, drills and blades.

Secured by Design (SBD) is the official police security initiative that works to improve the security of buildings and their immediate surroundings to provide safe places to live, work, shop and visit.

SBD's product based accreditation scheme – the Police Preferred Specification – provides a recognised standard for all security products that can deter and reduce crime.

View our Homeowners Guide to Energy Ratings and PAS 24 for further information

UK Burglary Statistics

In **76%** of cases, the burglar will enter through a door, of which...

- 33%** by forcing the lock or cylinder
- 15%** through an unlocked door
- 8%** by breaking the door or door panel
- 6%** enter the property with a key

In **20%** of cases the burglar will enter through a window, of which...

- 8%** force the window lock or latch
- 6%** cut through or break the glass
- 6%** will enter through an already open window

This means that **41%** of burglaries are owing to inferior windows and doors!

With Modern PVCu Windows & Doors

When Choosing Your New Windows

Made With Modern PVCu

There are many aspects to consider when choosing new windows for your home. Whilst size and shape will depend largely on the type of aperture, a wide variety of options are available in order for you to achieve the appearance you require to make it as individual as the interior.

Whether you choose the sleek appearance of the original chamfered or more decorative sculptured profile, the Selecta Systems window range will give you easy to maintain windows that are stylish, elegant and unique.

Reassuringly, the wide variety of designs available will complement the architecture of any home and add value.

Glass, Ventilation and Security

When choosing your glass design it is very important to consider the levels of privacy you require as well as the architectural look of your home.

Obscure, patterned, stained, leaded and georgian glass options are just some of the choices available with toughened glass and low emissivity glass offering energy saving aspects that will allow you to select a style that is both beautiful and practical.

Top, side and dummy openings can be used in a variety of combinations giving you flexibility in terms of style as well as improved ventilation and safety exits.

The window shootbolts and locking systems offer further 'peace of mind' with the majority offering the option of locking the window in a slightly open position.

5

" The innovative **ADVANCE 70 System has 5 chambers**, which offers fantastic thermal performance to **prevent heat loss** through the frames "

" Reassuringly, the wide variety of designs available will complement the architecture of any home and add value "

Secure, Energy Efficient & Bespoke

ADVANCE7 Bay & Bow Windows

Adding more light and space within your home

ADVANCE 70 Bay and Bow Windows are created by combining three or more windows together so that they angle out beyond the house wall. They can be casement, flush sash or tilt and turn depending on your needs. By using more windows, bay and bow windows allow more light in and also give you extra space inside your room.

A bay or bow window feature in your home, allows you to maximise a panoramic view or just make you feel closer to your garden.

Bay windows are perhaps the more common of the two reinforced window styles and generally consist of three windows of varying sizes. The central panel is often the largest, allowing for the best view, and this is then backed up by two panels, known as flankers, that are smaller in size and positioned at an angle.

Unlike bay windows, bow windows can generally consist of anywhere between three and six panels and they are generally all the same size. While the angles used in bay windows are often pronounced, the number of window panels used in bow windows are generally used in order to make for a more curved look.

MAINTAIN AND COMPLIMENT THE STYLE, PERIOD OR LOCATION OF YOUR HOME

GEORGIAN & ASTRAGAL BAR

The design of your windows and doors have a big impact on the appearance of your home. It's often important that the character of your home is maintained.

ADVANCE7 Flush Sash Windows

Traditional and Authentic Flush Windows

ADVANCE 70 Flush Sash Windows have been designed to suit both the traditional and modern market with practicality and modern day performance in mind.

Whether you are looking at replacement or new build, it is vitally important that the character and style of the property is maintained.

Our Flush Sash Windows are of high-performance, secure and visually stunning that are designed for hassle-free operation and maintenance.

Flush Sash Windows have become very popular over recent years, replicating traditional wooden windows with flush fitting sashes i.e. the window sash sits within the frame to finish flush with the face of the window.

Flush Sash Windows are practical and versatile with a stunning traditional or modern appearance which can be achieved with the choice of an 80mm traditional frame or modern 70mm frame.

Smooth lines and a stunning finish ensure that flush sash windows create a stylish, value-adding feature to your home.

REPLICATE TIMBER WINDOWS WITH EITHER A TRADITIONAL OR MODERN LOOK

FLUSH SASH WINDOWS

ADVANCE7 Residential Doors

Designed to Compliment Your Windows

The entrance to your home serves two main purposes; to act as a welcome to you, your family and friends and to keep unwanted visitors and the elements out.

Whether you require an inward or outward opening door, left or right hung preference or the choice of a low threshold easy access option for wheelchairs and pushchairs, you can be rest assured that our ADVANCE 70 residential door will look elegant whilst offering outstanding performance and security.

ADVANCE 70 doors offer excellent qualities in terms of thermal performance, security and aesthetics.

Our doors compliment the windows and are completely bespoke and made to order. There are a wide variety of colour options, styles and configurations, which allow for side panels, top lights and flag windows. Residential doors can either be full frame or fitted with a Part M compliant low threshold and come with a variety of choices when it comes to hardware and furniture colour.

The five chamber door system is designed to achieve high thermal efficiency standards that already surpass current government legislative requirements. All-in-all ADVANCE 70 residential doors are exceptionally practical and durable and have been rigorously tested for weather performance, operation and PAS 24 security to keep the elements and intruders at bay.

LOOKING FOR A STABLE DOOR THAT SUITS YOUR HOME AND LIFESTYLE

ADVANCE 70 STABLE DOORS

ADVANCE7 Conservatories & Orangeries

Add An Extra Room to Your Home

A conservatory or orangery can be one of the most important additions to any home offering additional space whilst adding beauty and value to a property. This is a major investment that should bring comfort, space, security and enjoyment to the home.

ADVANCE 70 conservatories and orangeries are all designed to meet your individual needs with many aspects incorporated into the design including aesthetics, light, thermal efficiency, cost and architecture.

ADVANCE 70 conservatories and orangeries are intended to bring beauty and warmth to an extra room that can be used all year round.

Choosing the Right Style

Great consideration is given to the style ensuring that it is sympathetic with your home and we offer a broad range of designs. We give thought to the features including the changes of the seasons, heat differentials throughout the year as well as stained glass options carefully positioned bevels that can enhance the view.

With a conservatory or orangery, vast attention is placed upon security and home safety whilst elegant handles and hinges are offered to ensure that your conservatory is both practically and aesthetically finished.

Our aim is to remove the worries or concerns regarding installation by providing a complete service which includes surveying, planning and building. With a conservatory, we endeavour to make sure that your installation is completed with minimal disruption to your home giving you time to enjoy the benefits.

CHOOSING THE RIGHT STYLE OF CONSERVATORY OR ORANGERY FOR YOUR HOME

ADVANCE 70 CONSERVATORIES & ORANGERIES

ADVANCE7 Vantage7 Outdoor Living

Window & Door Solutions for Outdoor Living

Since the beginning of 2020, making use of outdoor space has increased considerably in popularity. With relaxed building regulations surrounding outside buildings there has been a boom in garden rooms and offices, summer houses, log cabins and 'man-caves'.

This surge in outdoor living and the craving for extra space for recreational, entertaining and work purposes has seen the requirement to secure, improve thermal efficiency and enhance the look of these builds with modern PVCu windows and doors.

From simple fixed, side or top hung windows to the more extravagant flush sash window, there's a style available to suit the build style and it's surroundings.

Opening up the garden room, office, summer house, log cabin and man-cave to the outside space can be achieved with a range of sliding door options. Whether its a traditional patio door or our innovative and revolutionary EASI-FOLD swing and slide doors, creating a wall of glass that opens up the build to the outside space, is easily achievable.

French doors remain a popular option, providing a classic entrance to any build and when utilised with glass side panels, allow light to flood in to the garden build. Alternatively, a PVCu residential door can provide a secure and simple entrance door solution.

Add Some Colour to Your Home

Demand for coloured PVCu windows and doors in the UK is rising strongly. Homeowners are now loving colour! It's a way of personalising your home, making it look modern or giving it that traditional, authentic look. With the Colourfoil Collection, we have a range of the most modern, traditional and on-trend colours shades and finishes.

We have recently invested even further in colour expanding our Colourfoil Collection to 17 colours and 34 colour-ways!

The addition of the modern and contemporary shades of Ulti-Matt Black, Agate and Slate Grey, allow you to add on-trend colours to your windows and doors and compliment your homes style.

Traditional wood grain effects and colour shades enable you to create that period or heritage look to your home, meaning that there is a colour shade or grain effect to suit your home whatever the style, period or location.

View our Colourfoil Standard and Premium Collections

Both Sides | You can have your desired colour shade or woodgrain effect on both the internal and external sides of your window.

One Side | You can have your desired colour shade or woodgrain effect on either the external or internal side of your window or door, with the smooth white PVCu on the other side.

GRAINED OR SMOOTH?

Grained

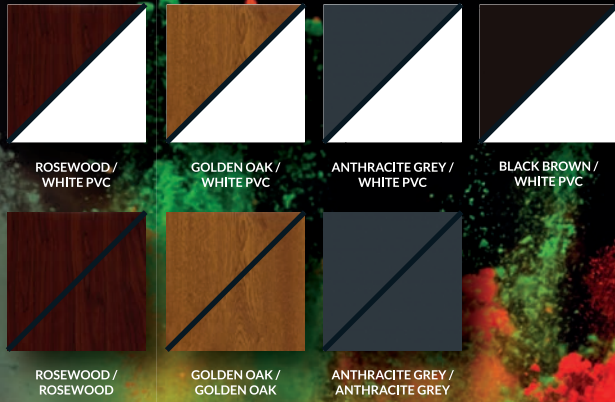

Colourfoil Collection - Grained and Smooth Finishes

A grained finish has been embossed to give a more realistic finish to the effect - a wood grained timber finish. Whereas, a smooth finish is to replicate an aluminium styled effect.

ADVANCE7 Window & Door Accessories

Adding Those Finishing Touches

Choosing the right window and door furniture, to fit in with the style of your home is of major importance. The same can be said of the glass options available to you. These simple touches can really add that finishing touch to your windows and doors.

HANDLES

Every window and door requires a handle! However, choosing the right handle is vitally important in keeping with the style of your chosen windows and doors.

For instance, a contemporary chrome handle works well on your more modern styled windows and doors, whereas a black or pewter monkey tail handle adds the classic appearance to heritage styled windows.

GLASS OPTIONS

As with your window and door furniture, the glass style and options play an important part in delivering a window or door that compliments the style, period and location of your home.

From clear, obscure or decorative glass to adding georgian bar or lead to your glass option, you can add that finishing touch.

DECORATIVE SASH HORNS

The decorative sash horn can add that authentic heritage look to a window, recreating the visual of a box sash.

This simple, yet effective feature can improve the appearance of a period home, with a run-through style that is almost seamless.

Sustainability & The Environment

With Modern PVCu Windows and Doors

With plastic very much the topic across the world, when it comes to its environmental impact, it's important to understand that not all plastics are as damaging to the environment as the media implies.

PVCu windows and doors have a long and low maintenance lifespan, which can see them last up to 30-40 years. What is more impressive, is the high quality reuse of PVCu, where it can be recycled up to 10 times, meaning a single window or door has a new life expectancy of 350 years!

This recyclability makes PVCu windows and doors one of the most sustainable products currently available in the building and home improvement market.

Selecta Systems and PVCu certainly has a large part to play in sustainability and reducing the impact on the environment.

"Selecta Systems were one of the first UK system houses to extrude all of our profile with 100% lead free PVCu. Producing 100% lead free profiles makes it easier to recycle at its life end, therefore safer for the environment. Selecta continually strive to improve our environmental performance and reduce our carbon footprint."

Did You Know?

350!

" PVCu, windows and doors can be **recycled up to 10 times**, meaning a single window or door has **a new life expectancy of 350 years!** "

Technical Information

About Modern PVCu

All Selecta Systems window and door products are manufactured from high impact, acrylic modified PVCu. The white PVCu profile is produced in a rigid multi-chamber extrusion, which conforms to BS EN 12608-1.

Extruded PVCu profile is produced by passing the compound into a heated chamber where high power vacuum and water cooled calibrators ensure that product integrity is maintained throughout the manufacturing process.

The ADVANCE 70 System comes in a smooth white, non-porous gloss finish, furthermore, the range is complemented by an attractive range of woodgrain & coloured foil finishes that have been tried and tested. The finish is stabilised against UV light to prevent any colour shift and meets all the industry standards of BS EN 12608-1.

PVCu manufacture is a low energy process and the ADVANCE 70 System has a proven track record of low maintenance and long life expectancy. This makes our products more cost effective in the long term with significantly higher levels of both sound and thermal insulation.

The product range from Selecta Systems has been carefully developed to incorporate a wide range of design aspects. Being fully aware of architects, specifiers and building regulation requirements, the design and production planning are vital components to ensuring that the most suitable products are provided for individual projects.

Whilst trading regulations may change from time to time, Selecta Systems provides product solutions that integrate into the existing fabric of any building guaranteeing performance, compatibility and visual appearance.

A wide range of hardware and accessories are also available with the ADVANCE 70 range of products enabling us to provide a complete solution for all design and specification needs.

2000 Pa

" The **Exposure Category** in Accordance with BS 6375 Part 1 for **ADVANCE 70 Casement Windows** "

(2000 Pa is equivalent to 127.71 mph!)

RTR Bar

(Recycled Thermal Reinforcement)

RTR Bar is reinforcement for PVCu windows and doors manufactured from first generation post consumer waste PVCu - recycled materials. Improved energy ratings can be achieved by using RTR Bar.

Glass Units

The ADVANCE 70 profiles have been designed to accommodate 24mm, 28mm and 40mm glass units - double or triple glazed units.

5 Chambers

The 5 chambers have been designed to maximise the thermal performance of the fabricated window or door.

Gaskets

Gaskets are co-extruded within the profile to provide a weathertight seal - no heat loss and no leaks.

100% Lead Free

Lead free materials are used in the extrusion of all our profile sections.

Low Sight Line

Designed specifically as a low sight line pre-gasketed profile system.

Energy Ratings

Using our products you can achieve 'A' Plus energy ratings thus providing a thermally efficient window or door.

Your Home Made Beautiful

SELECTA SYSTEMS APPROVED FABRICATORS & INSTALLERS

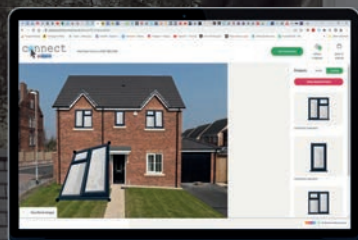

The ADVANCE 70, Vantage 70, MASTERSlide and EASI-FOLD Window and Door Systems are only available to purchase through our registered fabricators and installers. Each registered fabricator and/or installer will be able to advise you on the design, style, configurations and accessories available to suit you.

Browsing through the colour swatch enables you to choose the shade or effect that compliments your home, whether you are opting for a traditional or modern shade or a traditional wood grained effect.

Design Your Own Windows and Doors

Why not have a go at designing your own unique windows and doors, with our amazing Window & Door Designer with Home Visualiser? Ask your fabricator and/or installer about the fantastic way of designing your new windows and doors, taking a photo of your home and dropping your newly designed windows and doors on to your home! You can see how the style, colour and configuration suits your home before buying.

Head over to www.advance70.co.uk to see how the designer works!

SITE SURVEY

Your Selecta Systems Approved Fabricator and/or Installer will arrange a survey of your home at a time convenient to yourselves. The survey will ensure that the measurements are all precise and a chance to discuss your chosen window and door style and design. Ask questions at this point to make sure that you are happy with the final design and plans.

Your Selecta Systems Approved Fabricator and/or Installer will keep you up-to-date on your planned installation date. Your bespoke windows and doors will be manufactured to your design and quality tested to ensure they meet the exact requirements of you and your home. You can sit back and relax during this period! Remember, you should always obtain consent from a planning/conservation officer before proceeding with an installation.

INSTALLATION & TAKING CARE OF YOUR HOME

Your Selecta Systems Approved Fabricator and/or Installer are expert tradesmen who will respect your home and treat it with care during the installation process. Disruption will be kept to a minimum during the removal and installation of your new windows and doors, although it is inevitable that there will be a certain amount of disruption.

Your installer will make sure that any mess is kept to an absolute minimum and that your new windows and doors are installed with the utmost care and attention. Packaging and waste will be removed and recycled, where possible, leaving you to relax and enjoy your home being made
